TRANSPORT OF NEONATES FOLLOWING SURGICAL PROCEDURE

It is unit protocol that infants who require transportation to another hospital less than 24hrs post surgery:

- Are transported by the NETS team in the NETS transport cot. Nurse only is permissible if authorized by SR or Consultant.
- Are continuously cardiopulmonary monitored
- Require suction, oxygen and an appropriate sized bag and mask available **at all times** during transportation

[See NETS WA Manual](#) for further information.
