Preterm Birth Prevention Clinic

King Edward Memorial Hospital

If you have had a baby born early, you may be at increased risk of another preterm birth. Early planning and care can help reduce this risk.

Before your next pregnancy

Seek **pre-pregnancy care** with your GP or midwife. Early care helps reduce preterm birth risk. This applies even if your last baby was born early for medical reasons.

During your next pregnancy

Once your pregnancy is confirmed with a dating scan, please ask your GP or midwife to refer you to the **Preterm Birth Prevention Clinic** as early as possible.
